DATA SCIENTIST

Results-driven Data Scientist with over 6.5+ years of experience in developing generative AI models, specializing in Natural Language Processing (NLP), machine learning, and deploying innovative AI solutions. Proven expertise in designing complex generative models and managing end-to-end project lifecycles, leveraging advanced deep learning architectures to drive operational efficiency and innovation. Recognized for delivering substantial improvements through data-driven solutions.

KEY SKILLS

- Programming Languages: Python, SQL, PySpark, R
- Machine Learning Libraries: TensorFlow, PyTorch, Scikit-Learn, XGBoost, LightGBM
- Deep Learning: Transformers, CNNs, RNNs, NLP
- Machine Learning Techniques: Regression, Classification, Clustering, Boosting (XGBoost, LightGBM)
- Big Data & Cloud: Hadoop, Apache Spark, AWS, GCP
- Data Visualization: Tableau, Power BI, Excel
- ML Ops: Apache Airflow, Kubeflow
- Model Deployment & Integration: Flask, Docker, Kubernetes, Microservices
- Business Intelligence & Reporting: Power BI, Excel, Tableau
- Other Tools: Git, GitLab, Langchain, Llama Index

EDUCATION

- Masters on Data Science | Liverpool John Moores University | Sept '20 – Jul'21
- PG Diploma in Data Science | IIIT Bangalore & UpGrad | Sept '19- Sept '20
- BE- Computer Science | Bangalore University | 80.07% - First Class with Distinction | Jun '14 - Jun '18

PROFESSIONAL EXPERIENCE

SISTIC (Apr 2023 – Present)

Senior Data Scientist

- **Developed and deployed NLP, LLM(Gen AI),Transformer models** for genre classification and dynamic pricing, improving the **accuracy** and **predictive capabilities** of business models.
- Used **LLAMA Index** for model pipeline creation.
- Implemented machine learning models such as **recommendation engines** and **customer segmentation** to drive business insights and enhance customer targeting strategies.
- Leveraged **deep learning techniques** (CNNs, RNNs) and cloud platforms like **GCP** to build **real-time dashboards** for operational decision-making.
- Led **end-to-end project lifecycles**, from model development to **production deployment**, ensuring smooth integration into business processes via **ML Ops** practices.
- Worked closely with **cross-functional teams** to align data science outputs with business priorities and customer needs.
- Mentored junior data scientists and provided guidance on model development and deployment strategies.

Accion Labs (Apr 2022 – Mar 2023)

Data Scientist

- Built and optimized **recommendation systems** using NLP techniques, boosting **user engagement** and enhancing **recommendation accuracy**.
- Applied **advanced machine learning techniques** (e.g., clustering, decision trees, classification algorithms) to deliver business insights, improving **product recommendations**.
- Conducted data preprocessing and handled large-scale datasets using **PySpark** and **Hive** for efficient data manipulation and analysis.
- Designed and executed **experiments** to validate model effectiveness and optimize algorithms for production-level deployment.

Tata iQ (Jul 2018 – Mar 2022)

Data Scientist

- Created a **digital twin dashboard** using **SAM KNN techniques** to optimize material price forecasts and provide actionable business insights.
- Developed **forecasting models** for **commodity prices** (e.g., Steel, Copper, Aluminium) leveraging **VAR modeling** and **time-series analysis**.
- Applied **NLP techniques** for **text classification** and **customer segmentation**, which improved customer insights and targeting strategies.
- Developed and integrated **predictive models** for business applications, driving process optimization across multiple business verticals.
- Published research on **NLP advancements**, contributing to the latest industry practices and methodologies.

PROJECT HIGHLIGHTS

- **Propensity Modeling:** Built and deployed models to predict customer behavior and segment them for targeted campaigns, improving **conversion rates** and **customer satisfaction**.
- **Risk & Fraud Detection:** Developed machine learning models to detect fraudulent activities, ensuring **risk mitigation** and enhanced security for customer transactions.
- **Model Integration:** Integrated machine learning models with business processes via **ML Ops** practices to ensure that the models' outputs were actionable and aligned with organizational goals.
- **Real-World Model Deployment:** Led the development of models used in **environmental forecasting** and **agronomical scenarios**, providing valuable insights to non-technical stakeholders.

ADDITIONAL EXPERIENCE

- **Leadership & Mentorship:** Played a key role in mentoring junior data scientists, fostering an environment of **learning** and **growth** within the team.
- **Cross-functional Collaboration:** Collaborated with business leaders and technical teams to ensure alignment between **data science deliverables** and organizational priorities.
- **Model Monitoring & Optimization:** Developed processes and tools for **model monitoring**, ensuring continuous model optimization and performance tracking.
- **Communication Skills:** Extensive experience in **communicating complex technical concepts** to non-technical stakeholders, ensuring business teams are empowered to make data-driven decisions.

ADDITIONAL QUALITIES

- **Analytical & Critical Thinking:** Adept at identifying patterns and insights in large datasets, leveraging **statistical analysis** and **machine learning models** to inform business strategies.
- **Time Management:** Excellent at managing multiple projects simultaneously, ensuring timely delivery without compromising on quality.
- **Business Acumen:** Strong understanding of how to align data science projects with **business priorities**, driving value through actionable insights and model deployment.
